## **DETAILED ACTION**

### ***Election/Restrictions***

- 1) Applicant's election of species 1 in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2) Claims 3-4, 8, 10-12 and 14-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

### ***Claim Rejections - 35 USC § 112***

- 3) The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4) Claims 7, 9 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7 and 9 recites the limitation "the elastic member" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

- 5) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6) Claims 1-2, 5-7, 9 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Besonen et al (5307753).

In reference to claim 1, Besonen et al provides a counterbalance to control a load applied comprising: an elastic element (30) that at least partially counters the load; a flexible extension limiter (25) that provides a stop which defines a fully extended position of the counterbalance and which counters loads applied to the counterbalance after the counterbalance is in the fully extended position.

In reference to claim 2, Besonen et al provides a counterbalance where the elastic element is a spring.

In reference to claims 5 and 6, Besonen et al provides a counterbalance where the flexible extension limiter is a material strap.

In reference to claims 7 and 9, Besonen et al provides a counterbalance including a protective housing that at least partially covers the elastic member and the flexible extension limiter.

In reference to claim 13, Besonen et al provides the protective housing to include first and second tubes, the first tube having an opening that telescopically receives a portion of the second tube.

### ***Conclusion***

7) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Licata et al, Barrans, Jonsson, O'Brien, Pickles, Smith, Pfeiffer, Lowe, Taylor, Clauson, Wesch, and Bowers all provide counterbalance devices similar to the instant application.
